A WORD FROM THE PRESIDENT

Dear Colleagues, Dear Friends, Esteemed Partners,

On behalf of the Board of the **Tunisian Thoracic Surgery Association (TTSA)**, I am deeply honored and delighted to welcome you to the **5th edition of our National Congress of Thoracic Surgery**, taking place on **November 6–7, 2026**, in the historic city of **Sfax** at the prestigious **Borj Dhiafa Hotel**.

This milestone 2026 edition is dedicated to international scientific exchange and interdisciplinary collaboration. It is organized in close academic synergy with our esteemed partner societies: the **French Society of Thoracic and Cardiovascular Surgery (SFCTCV)**, the **Tunisian Society of Neurology (STN)**, and the **Association of Pulmonologists and Allergists of Central and Southern Tunisia (APACS)**.

Our scientific committee has designed a state-of-the-art program centered on **4 cardinal themes**: **Robotic Surgery** and cutting-edge innovations, multidisciplinary consensus in **Thymic Pathology**, therapeutic advances in **Endobronchial Approaches**, and enhanced recovery protocols in **Perioperative Care**.

Featuring **5 specialized hands-on workshops** for surgical and allied health professionals alongside over **75 peer-reviewed scientific communications**, this congress stands as a premier forum for clinical excellence and professional development for young surgeons and senior experts alike.

I extend my heartfelt gratitude to our national and international faculty for their distinguished scientific contributions, as well as to our medical industry partners and sponsors for their steadfast and generous support.

I wish you all an intellectually inspiring, productive congress, vibrant collegiate discussions, and a wonderful stay in Sfax.

Pr. Abdessalem HENTATI
President of the TTSA
Sfax, November 2026

Ruins of ancient Thaenae (Thyna). A pivotal hub of African commerce since the 2nd century BC, the city was gradually abandoned in favor of neighboring Taparura, giving birth in 849 AD to the modern city of Sfax, direct heir to its population and architectural stone.

ABOUT THE TTSA

The **Tunisian Thoracic Surgery Association** is the national learned society bringing together all Tunisian thoracic surgeons across university hospital centers, public institutions, and private practice, as well as surgical residents in training.

Officially founded: January 11, 2022 · Fully active since March 2023

STRATEGIC OBJECTIVES

01 Scientific Inquiry & Performance
Advance academic inquiry and continuing clinical excellence in thoracic surgery.

02 Academic Relations & Advisory
Foster academic networks and provide expert advisory opinions in the specialty.

03 Public Health Awareness
Raise public health awareness regarding smoking hazards and associated thoracic pathologies.

04 Patient Care Coordination
Coordinate collective efforts to optimize comprehensive care for thoracic surgery patients.

05 International Partnerships
Build enduring bilateral relations with peer thoracic and cardiovascular learned societies worldwide.

TTSA EXECUTIVE BOARD

Dr. Abdessalem HENTATI
PRESIDENT OF THE TTSA

TERM 2025 - 2026

Dr Saber HACHICHA VICE-PRESIDENT	**Dr Mahdi ABDENNADHER** GENERAL SECRETARY	**Dr Amina ABDELKEBIR** DEPUTY GENERAL SECRETARY
Dr Mohamed-Sadok BOUDAYA TREASURER	**Dr Walid ABID** DEPUTY TREASURER	**Dr Wassim CHAIEB** RESIDENTS' REPRESENTATIVE

View of the fortified ramparts of Sfax, founded in the 9th century under the Aghlabid Emir Abul Abbas Mohamed and overseen by the city cadi, Ali Ibn Aslam Al-Bakri. A symbol of the defensive might of Aghlabid Ifriqiya, this rampart has encircled the entire medina over two kilometers for more than eleven centuries.

Dar Jallouli, a jewel of Sfaxian heritage in the heart of the medina. A 17th-century patrician mansion now housing the Museum of Popular Arts and Traditions, it reveals around its sunlit courtyard the full refinement of traditional architecture — sculpted stone, antique ceramics, and green woodwork — while preserving Sfax's centuries-old costumes, jewelry, and artisanal craftsmanship.

ACKNOWLEDGEMENT TO PARTNERS

The TTSA warmly acknowledges its industry sponsors for supporting the advancement of thoracic surgery.

The vaulted alleys of Souk Er-Rbaa in the Medina of Sfax. Driven by the meticulous craftsmanship of master artisans and an enduring entrepreneurial spirit, this iconic landmark reflects the legendary Sfaxian culture of hard work — a devotion to discipline and excellence demonstrated year after year by the region's first-place national ranking in the baccalaureate examinations.

SCIENTIFIC PROGRAM

FRIDAY, NOVEMBER 06, 2026

DAY 1 · PRACTICAL WORKSHOPS

08h00 12h30	**Workshop: Introduction to Robotic Surgery** Dr Mohammed BEN AMAR Hands-on practical training & robotic immersion.	WORKSHOP
13h00 14h00 Vizir Hall	**Welcome & Registration**	WELCOME
14h00 15h30 Vizir Hall	**Medical Workshop: Ergonomics of Healthcare Personnel** Mme Majda ALILA	WORKSHOP
14h00 15h30 Diwan Hall	**Paramedical Workshop 1: Anesthesia in Thoracic Surgery** Dr Mariem BOUSARSAR Mme Hbiba KSOURI	WORKSHOP

Between sea and city, the crystallized basins of the Sfax-Thyna salt flats form a monumental landscape visible even from Earth's orbit. This iconic site embodies the dual identity of the southern metropolis: a premier industrial and economic powerhouse coupled with a vital ornithological sanctuary where flamingos flourish.

The majestic prayer hall of the Great Mosque of Sfax, founded in 849 AD under the Aghlabid dynasty alongside the medina's earliest ramparts. Beyond its remarkable architecture supported by a forest of antique columns, this monument stood for centuries as the beating heart of Islamic learning and theology in southern Tunisia. It was home to renowned Sfaxian scholars, jurists, and theologians—such as Qadi Ali Ibn Aslam Al-Bakri (who oversaw its construction) and the eminent scholar of law and language Ali of Sfax (Sheikh Ali Ennouri)—whose teachings and intellectual rigor profoundly shaped Islamic thought and the region's cultural identity.

Traditional feluccas resting in the Kerkennah archipelago, the maritime jewel of the Sfax region. These islands are home to a legendary fishing heritage, distinguished by the ancestral capture of octopus and the "Charfia" system —authentic traditional fish traps crafted from palm fronds, bearing witness to a timeless and ecological harmony between humanity and the sea.
